

RIDX™ AIV Ag Test Kit

Avian influenza (AI) refers to the disease caused by infection with avian influenza Type A viruses. These viruses occur naturally among wild aquatic birds worldwide and can infect domestic poultry and other bird and animal species.

The RIDX™ AIV Ag Test Kit is a diagnostic reagent that can quickly and easily detect AIV antigens in avian feces within 15 minutes after dropping the sample.

Principal: Chromatographic immunoassay for the qualitative test
Specimen: Avian stool or rectum

Components

- AIV Ag test device (30 tests)
- Sample dilution buffer (30 vials)
- Disposable swab (30 ea)
- Dropper cap with sample filter (30 ea)

Features

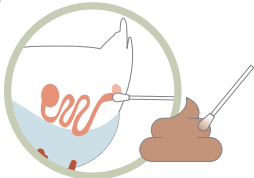

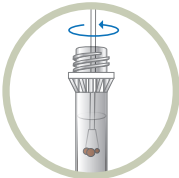

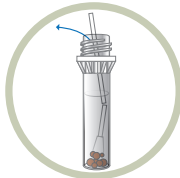

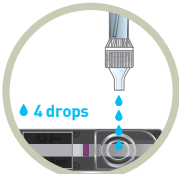

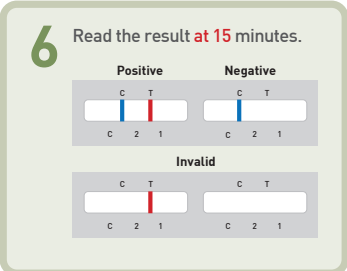

Sensitivity 100% (97/97) vs. RT-PCR (viral conc. $\geq 10^{4.0}$ EID₅₀/ml)

Specificity 99.5% (206/207) vs. RT-PCR

Limit of Detection $1 \times 10^{4.3}$ EID₅₀/ml (H5N2), $0.5 \times 10^{3.0}$ EID₅₀/ml (H5N8 & H5N6)

No Cross-reactivity with other avian pathogens (IBDV, IBV, ILTV, *M. gallisepticum*, and NDV)

Test Procedure

- Using a swab to collect diarrhea samples or diarrhea feces in the anus.
 
- Put the swab into the sample dilution buffer and stir the sample with the swab.
 
- Break the head of the cotton swab and discard the rod.
 
- Close the lid of the dropper cap with filter.
 
- Add 4 drops of the sample solution into the sample hole on the device.
 
- Read the result at 15 minutes.
