

RIDX®

Giardia Ag Test Kit

Giardia is a microscopic parasite that causes diarrheal disease. The variability in the concentration of organisms in the stool can make *Giardia* difficult to diagnose.

The RIDX® Giardia Ag Test Kit is a diagnostic reagent that can detect *Giardia* cyst antigen quickly and simply within 10 minutes after dropping the sample.

Principal: Chromatographic immunoassay for the qualitative test
Specimen: Canine or feline feces

Components

Giardia Ag test device (10 or 2 tests)
 Sample dilution buffer (10 or 2 vials)
 Disposable swab (10 or 2 ea)
 Disposable dropper (10 or 2 ea)
 Instructions for use (1 sheet)

Features

Clinical Sensitivity 97.1% (34/35)

Clinical Specificity 96.5% (109/113)

Limit of Detection 1.25 *Giardia* cysts/ul

No cross-reactivity with other pathogens (CCV, CDV, CIV, FCV, FCoV, and FPV)

Test Procedure

1 Using a swab to collect diarrhea samples or diarrhea feces in the anus.

2 Put the swab into the sample dilution buffer and stir the sample with the swab.

3 Remove the swab from the sample dilution buffer.

4 Place the tube until the large particles are down.

5 Take the supernatant using a dropper. Apply 4 drops of the sample solution into the sample hole on the device.

6 Read the result at 10 minutes.
